

HEALTHCARE'S BETTER WHEN IT'S CONNECTED.

KHIE is a secure, interoperable electronic network that supports the statewide exchange of patient health information among healthcare providers across the commonwealth. KHIE is a tool that can support improved health outcomes and reduce healthcare costs in Kentucky, including in the Commonwealth's rural areas.

Some Case Report Forms are still in development and are not currently available for the following communicable diseases:

MDRO

1. Clostridioides difficile
